

Set up Instructions for Your Cigar Caddy™ Travel Humidor

Congratulations on the purchase of your new **Cigar Caddy™** brand travel humidor. You are just a few steps away from enjoying your favorite cigars, in top condition, anywhere you travel.

After opening the case (a coin or key can assist opening if the pressure lock feature is on), locate the humidification disc on the top section. It is recommended to use an eye dropper with distilled or purified water. Simply put 6-8 drops of water into the humidification disc and allow the water to be absorbed fully. Wipe the top of the disc of any excess water. You are now ready to use your **Cigar Caddy™**.
